EDUCATION

Michigan State University — **Expected May 2028**
Master of Science in Computer Science — *East Lansing, MI*

Northern Michigan University — **Graduated 2026**
Bachelor of Science in Computer Science, Minor in Mathematics (GPA: 3.70) — *Marquette, MI*

- Honors: Dean's List, Michigan Achievement Scholarship Recipient
- Relevant Coursework: Artificial Intelligence, Parallel & Distributed Processing, Operating Systems, Server-Side Programming, Linear Algebra, Data Structures

TECHNICAL SKILLS

Languages: Java, Python, C++, TypeScript, JavaScript, SQL, HTML/CSS
Frameworks: React, ROS 2, Node.js, Supabase, WordPress
Tools: Git, Docker, Shopify API, Shopify CLI
Concepts: OOP, Data Structures & Algorithms, RESTful APIs, Relational Databases

PROFESSIONAL EXPERIENCE

Shumaker Technology Group — Sep 2026 - Present
Web Development Intern

- Maintain and update client websites built on WordPress, resolving support tickets through OneDesk.
- Develop new client websites with responsive, mobile-friendly, and WCAG-accessible design.

MSU Department of Biosystems & Agricultural Engineering — Jun 2026 - Aug 2026
Student Research Assistant

- Integrated a 3D opponent detection model into ROS 2 for autonomous racing, optimizing with TensorRT to achieve sub-6ms inference.
- Validated detection and position accuracy against ground-truth benchmarks to ensure reliability for real-time racing.

Getz's Clothiers — Mar 2022 - May 2026
Software Developer / Sales Associate

- Developed and deployed new functionality within the Shopify ecosystem, improving multi-location inventory management for 10,000+ SKUs.
- Designed a barcode-printing and product-pricing application that increased pricing efficiency by 80%.
- Leveraged Shopify Liquid and React to implement custom POS features, including automated discount logic and charge accounts.

TECHNICAL PROJECTS

Top Ledger | React, TypeScript, Supabase, PostgreSQL

- Developed a full-stack sports betting tracker enabling users to place simulated bets and track profit and loss in real time.
- Integrated external sports data APIs to provide live odds and game updates.
- Utilized Supabase for secure user authentication and PostgreSQL for relational data management between users and wagers.
